

RUGER

THE MODERN TOOLS WITH SALES APPEAL

Improved design, top quality materials, precision production methods—all build *extra saleability* into the Ruger line of modern hand tools.

RUGER SPIRAL RATCHET SCREW DRIVERS

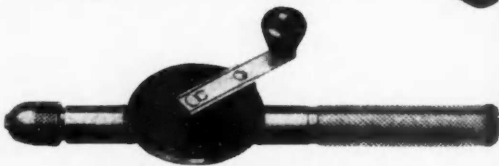

Close-up of
ball-bearing
drive

Two types—hand return and automatic return. The new Ruger Ball-Bearing Drive, an outstanding innovation, speeds operation, minimizes friction, adds life. Handsomely finished, with lacquered mahogany finish handle, highly polished body, rust-proofed shaft. Three-way ratchet shift. Supplied with three bits. Individually boxed.

RUGER BIT BRACE

Forged steel parts—no cast iron used. One-piece frame, with integral chuck head. Powerful universal chuck jaws. New type fine-tooth ratchet, for better work in close quarters; fully enclosed. Crack-proof, warp-proof hard rubber handle and head. Head molded permanently over steel hub.

RUGER STRAIGHT HAND DRILL

Modern, simplified design. Heavy steel tubular body protects pinions and spindle, provides storage space for drills. Rugged spindle bearings. Husky main gear teeth. Bevel gear of long-wearing Zamak alloy, supported by idler pinion. Three-jaw chuck with full $\frac{1}{4}$ " drill capacity. Gleaming gun-metal finished, knurled handle.

Ruger builds this new saleability into tools that everyone needs—new perfection of design, new and better looks. Write for full information.
